

Conserve Water Educators Guide

International Project WET Foundation, 2000

Available: <http://store.projectwet.org/educators-guides.html?p=2>

Description

This comprehensive educators' guide provides teachers of middle school and high school students with a thorough overview of water conservation, along with background information that serves as a hydrologic primer. Past, present, and future water conservation issues are also covered, which are illustrated by case studies ranging from a rancher in west Texas to an ice cream factory in Massachusetts. By using real-life examples, students are encouraged to use critical thinking skills to examine different sides of each situation.
